SHOTGUNS

SHOTGUNS

Features

FEATHER TECHNOLOGY
- Browning Feather technology reduces weight by about one pound by using a high quality alloy rather than steel for the receiver.
- Steel components are added to high-wear areas such as the breech face and hinge surfaces for added durability.

INFLEX® RECOIL PAD
- Inflex recoil pads are made from a soft, recoil absorbing material.
- Directional deflection construction guides the comb down and away from the face for greater shooting comfort and faster, more accurate follow-up shots.

HIGH RIB
- Offers increased visibility on target models, meaning the barrels don't cover up the clay bird.
- Improved cooling helps prevent heat waves from distorting visibility.

SILVER NITRIDE
- Silver nitriding is a proprietary process known as salt bath ferritic nitrocarburizing.
- Compared to coating or heat treatment processes, silver nitride offers the advantages of: Excellent cosmetic finish, improved wear resistance, increased fatigue strength and added protection against corrosion.

FLOATING RIB
- A floating rib prevents point of impact shifts caused by barrel heating as it allows the rib and barrel to expand independently.

MICRO AND MICRO MIDAS FIREARMS
- Micro and Micro Midas firearms feature shorter lengths of pull that give smaller shooters a great fitting firearm with the same quality as all Browning firearms.
- Micro Midas models have the shortest lengths of pull, while Micro models are usually an inch or less longer than Micro Midas models.

STEEL SHOT PERFORMANCE
- Browning has pioneered construction techniques that maximize both steel shot performance and barrel durability.
- Browning barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to precise construction quality standards.

TOTAL BARREL DYNAMICS
- Total Barrel Dynamics is the combination of Vector Pro forcing cone lengthening, Back-Bored Technology and an Invector interchangeable choke tube system working in unison to optimize shot pattern performance. Each component of Total Barrel Dynamics plays a part to reduce shot deformation, improve pattern density, and put more pellets on the target.
- Total Barrel Dynamics is featured on A5, BT-99 and on 12 and 20 gauge Citori 725, Citori and Cynergy models.

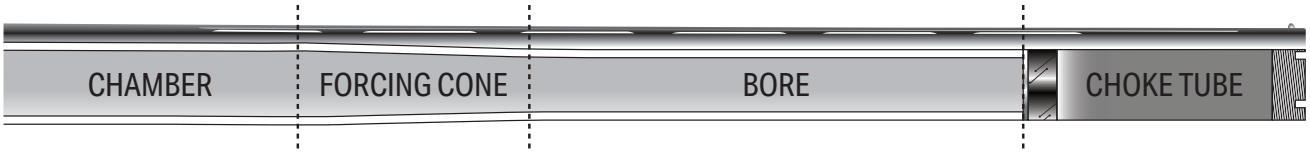

VECTOR PRO LENGTHENED FORCING CONE
- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. Vector Pro is superior because it has a gradual taper.
- The Vector Pro forcing cone reduces stress on the shot column as it moves into the bore to reduce pellet deformation for more uniform patterns and more pellets in the center of the pattern.
- Lengthening forcing cones is a popular and expensive aftermarket practice but it comes standard on A5, BT-99 and on 12 and 20 gauge Citori 725, Citori and Cynergy models.

BACK-BORED TECHNOLOGY
- Back-boring enlarges the bore to the maximum diameter to increase shot velocity and minimize pellet deformity for more uniform patterns and a reduction in felt recoil.
- Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bored Technology is standard on A5, Maxus II, BT-99 and on 12 and 20 gauge Citori 725, Citori, Cynergy, BPS and Silver models.

INVECTOR-DS CHOKE TUBE SYSTEM
- "DS" stands for double-seal, our proprietary differential-banded brass seal. It compresses against the barrel wall to keep the choke tube threads clean, making installation and removal easier than any other muzzle thread system.
- Muzzle-end threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for a faster swing and improved balance.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard-hitting performance.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- Invector-DS is standard on A5 and Citori 725 models.

INVECTOR-PLUS CHOKE TUBE SYSTEM
- Invector-Plus provides championship winning performance.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end of the choke tube prevent gases from slipping between the choke tube and barrel that could damage the choke tube and bulge the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus II, Citori, Cynergy, Silver, BPS and BT-99 models.

STANDARD INVECTOR CHOKE TUBE SYSTEM
- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the right constriction needed for the shooting situation.
- Threads on the breech end of the choke tube help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and bulge the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori 725, Citori, Cynergy, and Gold models.

VECTORPRO™ BACK-BORED TECHNOLOGY INVECTOR-DS™ INVECTOR-PLUS™ STANDARD INVECTOR™

CITORI

Common Features

Citori

INTERCHANGEABLE CHOKE TUBES

12 and 20 gauge models receive the Invector-Plus Interchangeable Choke Tube System and 28 gauge and .410 bore models benefit from the Standard Invector system.

A CITORI WEARS IN, NOT OUT

The Citori features a stronger and longer lasting full-width hinge pin that pivots on significantly more bearing surface area than the trunnion systems in competitors' guns.

The Citori also uses a transverse-mounted, full-width tapered locking bolt and monoblock recess for maximum strength and longevity. This design also self-adjusts for wear to keep receiver lock-up tight.

RECEIVER MATERIALS

Most Citori receivers are machined from steel and feature a durable silver nitride finish that offers improved wear resistance, increased fatigue strength and added protection against corrosion.

Citori Feather models feature a high quality alloy for the receiver that reduces weight and is reinforced with steel components at high wear areas for added durability. Feather models have a tough electroless nickel finish.

PRECISION BARRELS

Browning barrels optimize shot performance and emphasize durability.

CHROME CHAMBERS

All Citori shotguns feature chrome chambers for increased durability, corrosion resistance and easier cleaning.

INERTIA TRIGGER

The inertia-style trigger uses recoil from the first shot to set the hammer for the next shot.

HAMMERS AND HAMMER EJECTORS

Citori hammers are driven by powerful coil mainsprings. Ejectors are activated by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. Fired hulls are ejected when the breech is opened and unfired shells are elevated for easy removal.

POINT OF IMPACT

A big part of what makes the Citori shotgun line so versatile are the different points of impact (POI) on different models. The flat 50/50 POI is preferred when a target presentation can come from any direction, like a target soaring in from overhead on a sporting clays course or a pheasant erupting from the brush. The versatile 60/40 POI is great for all clay target sports and hunting as it allows the shooter to float the target slightly to improve the sight picture. Shotguns with a 70/30 POI are more suited to trap, where the higher POI allows a rising target to be visible when the trigger is pulled.

THREE POSITION TRIGGER

Featured on target models, the adjustable Three Position Trigger allows the trigger shoe to be set in one of three positions to fine-tune finger-to-trigger reach.

One trigger shoe is included.

INFLEX II RECOIL PAD

The Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex II pad is made from a soft material for the best recoil absorbing performance available.

CITORI

Citori

Citori 50 years 1973 2023

IT'S HISTORY

Although John M. Browning's Superposed wasn't the first over and under shotgun in history, it became the first that achieved commercial popularity around the globe. The genesis of the idea for this design grew from Browning's love of target shooting and bird hunting; and also his insatiable need to innovate and improve products that satisfied the needs of hunters and competitors. It was his belief that a single sighting plane, single selective trigger, and a reliable operating mechanism would prove superior to the side-by-side shotguns of the era. Unfortunately, the Superposed was also the final act of the famed designer, as John Moses Browning passed away in 1926 before the shotgun was produced.

In 1973, Browning launched the descendant to the famed Superposed — the Citori. The new Citori, produced by Miroku Corporation in Nangoku, Japan, built upon the performance of that legendary over and under and featured a number of changes that improved upon the original design and streamlined manufacturing. It didn't take but a few years for the Citori to gain a loyal following of its own and soon became the number one selling over and under shotgun in the world. Over the years, the Citori has been offered in 12, 16, 20 and 28 gauges and .410 bore. Models have ranged from hard-working, field-grade guns up to elegant, hand-engraved presentation grade guns being produced.

50 years later, the Citori continues to inspire shooters on the range and in the field with its balanced handling, reliability and beauty. Every Citori is still produced with an exacting fitting process that is performed by the skilled hands of the men and women at the Miroku facility. The Citori embodies the spirit of Browning — among shotguns, they truly are "The Best There Is."

NEW

HIGH GRADE 50TH ANNIVERSARY

LIMITED EDITION OFFERING FOR 2023

$400 VALUE

Negrini locking hardcase with leather trim and padded, felt lining included

- Silver nitride steel receiver features extensive engraving with 24 karat gold enhancement and 50 years logo
- Proprietary premium gloss oil finish process Grade IV Turkish walnut stock with cut checkering, right-hand palm swell and name plate inlay for owner's initials
- Letter of authenticity
- High-gloss blued barrels
- Inflex II recoil pad
- Triple Trigger System with three trigger shoes
- HiViz® Pro Comp sight and ivory mid-bead
- Five Midas extended choke tubes
- POI: 50/50
- Ideal for sporting clays/skeet/hunting

CITORI 725

Common Features

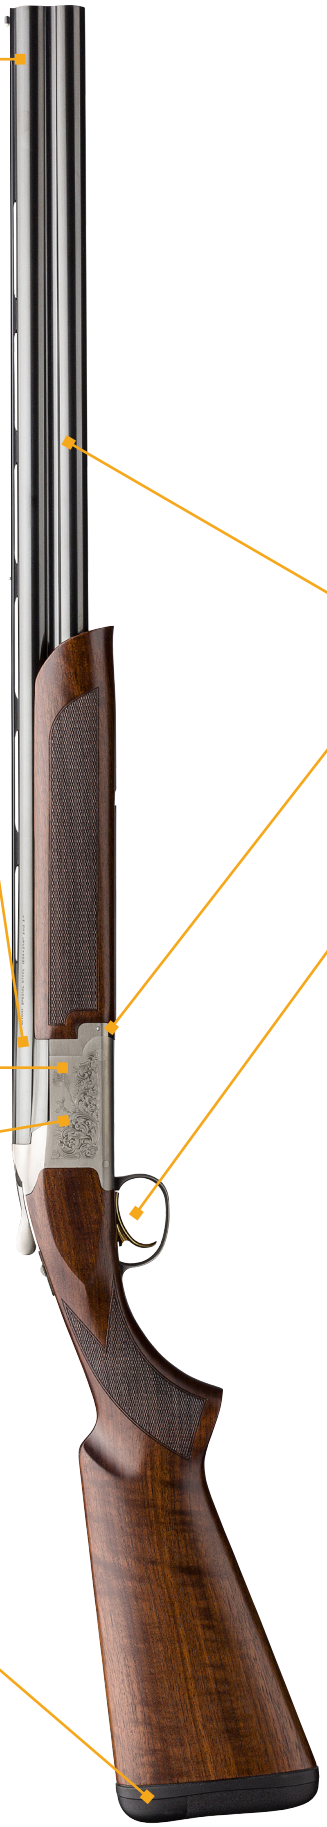

725 CITORI

INTERCHANGEABLE CHOKE TUBES

12 and 20 gauge models receive the Invector-DS Interchangeable Choke Tube System and 28 gauge and .410 bore models benefit from the Standard Invector system.

A CITORI 725 WEARS IN, NOT OUT

Unlike many low-profile over and unders that use variations of a trunnion-style hinge, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin for maximum strength and longevity. This design also self-adjusts for wear to keep receiver lock-up tight.

CHROME CHAMBERS

All Citori 725 shotguns feature chrome chambers for increased durability, corrosion resistance and easier cleaning.

PRECISION BARRELS

Browning barrels optimize shot performance and emphasize durability.

ERGO BALANCED

Incredible balance in the hands facilitates a light feel, fast swing and promotes a smoother follow through.

RECEIVER MATERIALS

Most Citori 725 receivers are machined from steel and feature a durable silver nitride finish that offers improved wear resistance, increased fatigue strength and added protection against corrosion.

Citori 725 Feather models feature a high quality alloy for the receiver that reduces weight and is reinforced with steel components at high wear areas for added durability. Feather models have a tough electroless nickel finish.

FIRE LITE TRIGGER

This mechanical trigger offers immediate second shot capability without using recoil to set the next shot. Provides improved performance with reduced take-up, a crisp break and less overtravel.

LOW PROFILE RECEIVER

A low profile receiver improves recoil control, reduces muzzle jump and places the front hand closer to the bore line for superior hand-eye coordination and pointability. These factors contribute to the "one with the gun" feeling of the Citori 725.

PRO BALANCE SYSTEM

Citori 725 Pro models include the Pro Balance System that allows the shooter to add or remove weights from the stock and fine-tune the balance point for a perfect mount and swing.

TRIPLE TRIGGER SYSTEM

Featured on target models, the adjustable Triple Trigger System lets the shooter set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.

Three interchangeable trigger shoes are included.

INFLEX II RECOIL PAD

The Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex II pad is made from a soft material for the best recoil absorbing performance available.

CYNERGY

Common Features

CYNERGY®

INTERCHANGEABLE CHOKE TUBES

To maximize versatility and optimize shot pattern performance, Cynergy shotguns feature the Invector-Plus system.

POINT OF IMPACT

Cynergy shotguns feature a 60/40 POI that is preferred when a target presentation can come from anywhere, like a clay target soaring above or a pheasant erupting from the brush. The Classic Trap model features a 70/30 POI that is ideal for trap.

IMPACT EJECTORS

Impact Ejectors are aided by a secondary striker spring for positive, reliable ejection of fired hulls from the chambers. Unfired shells are elevated for easy removal.

THE LOWEST PROFILE RECEIVER

The Cynergy offers the lowest profile receiver of any 12 gauge over and under. It places the front hand closer to the bore line to improve pointability, recoil control and reduce muzzle jump.

The strong MonoLock Hinge design is the engineering behind the low receiver profile. It integrates the monoblock and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges. Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.

Cynergy receivers are machined from steel for a long life and feature a durable, attractive silver nitride finish.

PRECISION BARRELS

Browning barrels optimize shot performance and emphasize durability.

CHROME CHAMBERS

Cynergy shotguns feature chrome chambers for increased durability, corrosion resistance and easier cleaning.

REVERSE STRIKER TRIGGER

The Reverse Striker is a striker-based, mechanical trigger system that does not use the inertia from recoil to set the hammers. It offers a crisp feel, reduced locktime and less overtravel than other over and under shotguns and eliminates the possibility of the second barrel not firing.

TRIPLE TRIGGER SYSTEM

Featured on trap models, the adjustable Triple Trigger System lets the shooter set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.

Three interchangeable trigger shoes are included.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Cynergy hammers are driven by powerful coil mainsprings. The convenient barrel selector allows the shooter to choose which barrel fires on the first pull of the single trigger and the second pull fires the remaining barrel. Ejectors are activated by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. Automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

THREE POSITION TRIGGER

Featured on target models, the adjustable Three Position Trigger lets the shooter set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.

One trigger shoe is included.

INFLEX RECOIL PAD

The Inflex recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex pad is made from a soft material for the best recoil absorbing performance available.

CYNERGY®

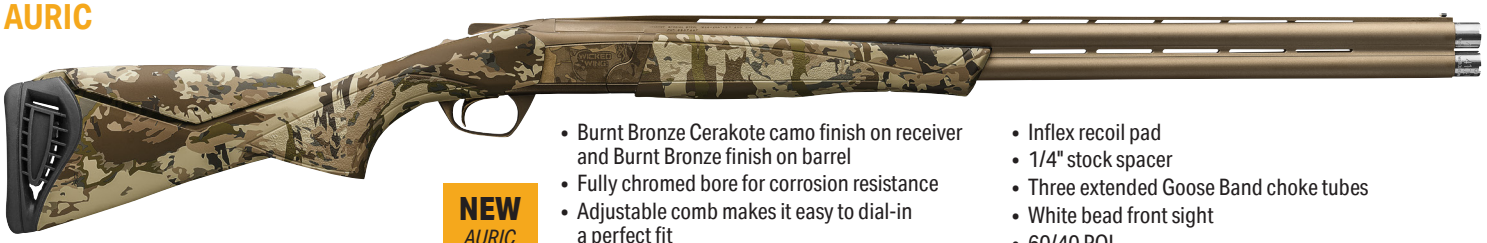

WICKED WING VINTAGE TAN

- Burnt Bronze Cerakote camo finish on receiver and Burnt Bronze finish on barrel
- Fully chromed bore for corrosion resistance

BT-99
Common Features

BT99

INTERCHANGEABLE CHOKE TUBES
To maximize versatility and optimize shot pattern performance, BT-99 shotguns feature the Invector-Plus system.

FLOATING RIB
Most target models feature a floating rib that allows the rib and barrel to expand at different rates to eliminate stress.

Prevents changes to point of impact due to barrel heating and the rib staying cool.

Ventilated side rib increases air circulation to aid in barrel cooling.

FOREARM
A beavertail forearm helps control recoil and assists hand-eye coordination.

CHROME CHAMBER
BT-99 shotguns feature a chrome chamber for increased durability and corrosion resistance.

BUILT TO LAST
The BT-99 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin for maximum strength and longevity.

The full-width tapered locking bolt and monoblock recess allows the bolt to accommodate for wear to keep receiver lock-up tight.

HEAVY-DUTY RECEIVER
Dollar for dollar, there isn't a better single-barrel trap gun than the BT-99. The receiver is machined from steel and features a durable silver nitride or richly blued finish.

COMFORTABLE RECOIL PAD
BT-99 models use either a traditional trap-style pad with a concave face or Inflex II recoil pad. The Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

Both pads are designed to increase shooting comfort and reduce felt recoil.

A5
Common Features

A5 and A5 sweet sixteen

INTERCHANGEABLE CHOKE TUBES
To maximize versatility and optimize shot pattern performance, the A5 features the Invector-DS system.

FLAT POINT OF IMPACT
A low rib is in line with the top of the receiver and translates into dead-flat 50/50 point of impact.

CHROME CHAMBER AND BORE
The chrome chamber and bore increase durability and corrosion resistance and make the bore easier to clean.

RECEIVER
Constructed from rugged, lightweight aluminum alloy, the humpback shape speeds target acquisition and extends the sight plane for faster, more natural sight alignment.

ERGONOMIC BOLT LATCH
Conveniently located just ahead of the trigger guard, the bolt latch locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading. The oversized shape makes the bolt latch easy to locate and operate.

INFLEX II RECOIL PAD
The Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex II pad is made from a soft material for the best recoil absorbing performance available.

KINEMATIC DRIVE SYSTEM
The A5 uses kinetic energy — the energy of motion — to power the recoil-operated Kinematic Drive System. This simple design offers consistent, reliable function and superior load versatility with factory ammunition even under the extremes of weather, temperature, moisture and grime.

Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000 round or five-year guarantee.

TURNKEY MAGAZINE PLUG
The patented TurnKey Magazine Plug is easily removed in seconds using a standard door or car key.

ADDITIONAL PROTECTION
The bolt slide, shell carrier, bolt release button and cocking handle of the A5 have a nickel Teflon™ coating that adds corrosion protection, lubricity and makes cleaning easier. The bolt is hard chrome plated for added resistance to wear.

ERGO BALANCED
Incredible balance in the hands facilitates a light feel, fast swing and promotes follow through.

SPEED LOAD PLUS
Patented feeding system sends the first shell loaded into the magazine directly into the chamber.

Speed Unload makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

CUSTOMIZED FIT
A5 shotguns include one 1/4" and one 1/2" stock spacer for length of pull adjustment. Drop and cast can be tuned using the included stock shim kit.

ABS CASE INCLUDED

WICKED WING VINTAGE TAN

NEW *16 Gauge Model*

- Burnt Bronze Cerakote camo finish on receiver and Burnt Bronze finish on barrel

MAXUS II

Common Features

INTERCHANGEABLE CHOKE TUBES
To maximize versatility and optimize shot pattern performance, Maxus II shotguns feature the Invector-Plus system.

MAGAZINE CUT-OFF
The magazine cut-off allows the chamber to be unloaded to change loads without cycling a shell from the magazine.

Useful when hunting different bird species and different loads are instantly required.

MAGAZINE CAP
The forearm features a screw-on magazine cap.

FLAT POINT OF IMPACT
A low rib is in line with the top of the receiver and translates into dead-flat 50/50 point of impact.

LIGHTWEIGHT MAGAZINE TUBE
An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.

CHROME CHAMBER AND BORE
The chrome chamber and bore increase durability and corrosion resistance.

ENHANCED CONTROLS
An oversized bolt handle and enlarged bolt release offer positive operation in all conditions.

SOFTFLEX™ CHEEKPAD
The SoftFlex cheekpad uses the same technology as the REACTAR G3 shoulder pad to increase shooting comfort.

TRIMMABLE COMPOSITE STOCK
The composite stock features a straight heel section that makes it easy for a gunsmith to shorten the length of pull up to 3/4" and refit the recoil pad. One 1/4" and one 1/2" stock spacer are included for length of pull adjustment. Drop and cast can be tuned using the included stock shim kit.

INFLEX II RECOIL PAD
The 1-1/4" thick Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex II pad is made from a soft material for the best recoil absorbing performance available.

TURNKEY MAGAZINE PLUG
The patented TurnKey Magazine Plug is easily removed in seconds using a standard door or car key.

NICKEL TEFLON™ COATING
The bolt, bolt slide, shell carrier, bolt release button and cocking handle of the Maxus II have a nickel Teflon™ coating for added corrosion protection, lubricity and makes cleaning easier.

SPEED LOAD PLUS
Patented feeding system sends the first shell loaded into the magazine directly into the chamber.

Speed Unload makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

TRIGGER GUARD
The trigger guard design is ramped to make loading easier.

LIGHTNING TRIGGER
The Lightning Trigger offers a smooth, crisp feel with minimal travel. Lock times average up to 24% faster than other autoloaders. Easily removed for cleaning.

POWER DRIVE GAS SYSTEM
Gas piston operation is super fast and extremely reliable.

Oversized exhaust ports dump gases faster with heavy loads to reduce recoil. 20% longer piston stroke travel improves reliability.

An enclosed seal keeps residue out of the action for cleaner operation.

The Power Drive Gas System works with the Inflex II Technology recoil pad to reduce muzzle jump up to 44% compared to the competition.

SILVER

Common Features

FRONT SIGHT
Brass bead front sight.

INTERCHANGEABLE CHOKE TUBES
To maximize versatility and optimize shot pattern performance, Silver shotguns feature the Invector-Plus system.

FINGER GROOVE
For shooting comfort.

BOLT AND BOLT SLIDE
The bolt and bolt slide are coated with a tough, durable phosphate finish.

RECEIVER
Constructed from rugged, lightweight aluminum alloy.

SEMI-HUMPBACK
Offers longer sight plane.

GRIPPING SURFACES
Silver shotguns feature checkered gripping surfaces for a sure hold in all climate conditions.

ACTIVE VALVE GAS SYSTEM
The self-adjusting Active Valve Gas System efficiently adapts to reliably fire a wide range of loads. The piston retains more gas from lighter loads to aid reliability and vents more gas from heavier loads to lessen felt recoil. Excess gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.

BPS

Common Features

INTERCHANGEABLE CHOKE TUBES

To maximize versatility and optimize shot pattern performance the BPS shotgun features interchangeable chokes. 12 and 20 gauge models receive the Invector-Plus system and 10 and 28 gauge and .410 bore models benefit from the Standard Invector system.

RELIABLE PUMP-ACTION

The reliable pump-action features rugged steel components including a pair of rigid action bars made from heat-treated steel that eliminate twisting and binding for faster, more efficient slide-action operation.

RECEIVER

The receiver is machined from a solid block of forged steel.

TOP-TANG SAFETY

The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand.

INFLEX II RECOIL PAD

The Inflex II recoil pad uses directional deflection to send the comb down and away from the face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.

The Inflex II pad is made from a soft material for the best recoil absorbing performance available.

FLOATING RIB

Most target models feature a floating rib that allows the rib and barrel to expand at different rates to eliminate stress.

Prevents changes to point of impact due to barrel heating and the rib staying cool.

Ventilated side rib increases air circulation to aid in barrel cooling.

BOTTOM EJECTION AND LOADING

Bottom ejection throws empty hulls straight down and out of the line of sight, making the BPS an ideal choice for both right- and left-handed shooters.

OVERSIZED TRIGGER GUARD

The trigger guard is large and has carefully rounded edges.

TRIMMABLE COMPOSITE STOCK

The composite stock features a straight heel section that makes it easy for a gunsmith to shorten the length of pull 3/4" and refit the recoil pad.

RIFLES

X-BOLT
Common Features

MUZZLE BRAKE
Many X-Bolt rifles feature a removable muzzle brake. The Recoil Hawg and Sporter Recoil Hawg muzzle brakes are engineered to significantly reduce muzzle jump and felt recoil.

The Recoil Hawg is designed to fit larger diameter target and long-range profile barrels. The Sporter Recoil Hawg is tailored specifically for smaller diameter, sporter profile barrels. Both models reduce felt recoil by as much as 76%, depending on the caliber.

Radial-style muzzle brakes on some X-Bolt rifles also reduce felt recoil and can be easily upgraded to a Recoil Hawg by the consumer.

A thread protector is included with most hunting model rifles.

FREE-FLOATING BARREL
Every X-Bolt action is bedded into the stock at the front and rear action screws and recoil lug for a true free-floating barrel.

Barrels are button rifled and triple checked for interior finish, straightness and air-gauged for uniformity. Every chamber is hand-reamed for precision accuracy and a recessed muzzle crown helps protect the rifling from damage.

X-LOCK SCOPE MOUNTING SYSTEM
X-Lock mounts feature a four screws-per-base design that replaces the traditional two screw system to offer more accurate placement and more secure attachment to the receiver.

BOLT UNLOCK BUTTON
The bolt unlock button provides an extra margin of safety when checking and unloading the chamber

TOP-TANG SAFETY
The top-tang safety is easy to operate with the thumb. It blocks the trigger sear and features a firing pin block for added security.

INFLEX RECOIL PAD
The Inflex recoil pad features internal directional ribs that move the comb down and away from the cheek to increase shooting comfort.

RATE OF TWIST
Select X-Bolt Long Range models incorporate faster rates of twist to better stabilize longer, heavier bullets. 6.5 Creedmoor: 1-7"
28 Nosler: 1-8", 300 Win. Mag.: 1-8"

ROTARY MAGAZINE
The rotary magazine is removable, durable, easy to load and feeds rounds from the center line, not off to the side like other rifles, for straight to the chamber feeds. Unique design holds U.S. patent numbers: 8,156,675; 8,484,875 and 8,745,912.

60° BOLT LIFT
Short 60˚ bolt lift is fast cycling and allows the hand to easily clear scope turrets.

The bolt body is machined from solid steel bar stock for strength and custom rifle precision and has three locking lugs providing exceptional bolt strength.

FEATHER TRIGGER
The three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep, minimal overtravel and is adjustable from 3 to 5 lbs. (Factory pre-set at approximately 3-1/2 to 4 lbs.)

The alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

PERSONALIZED ENGRAVING
The bolt can be personalized with the owner's name (except Pro models). Call (800) 333-3288 for more information.

ADJUSTABLE COMB
Certain models feature an adjustable comb system that offers up to 1" of height adjustment to place the shooter's eye in alignment with large diameter optics.

RECOIL HAWG

Recoil Hawg

Sporter Recoil Hawg

RECOIL HAWG — DEVOUR FELT RECOIL

Browning has developed one of the most effective muzzle brakes in the industry. The Recoil Hawg is designed to increase shooting comfort, improve accuracy and add confidence by simply reducing felt recoil.

The Recoil Hawg relies on specially designed porting that directs gases up and to the sides. The multiple ports effectively expel gases to reduce felt recoil by as much as 76% (depending on caliber and brake). This makes the sensation of shooting the 300 RUM from a rifle equipped with a Recoil Hawg similar to shooting a rifle chambered in 6.5 Creedmoor without a muzzle brake.

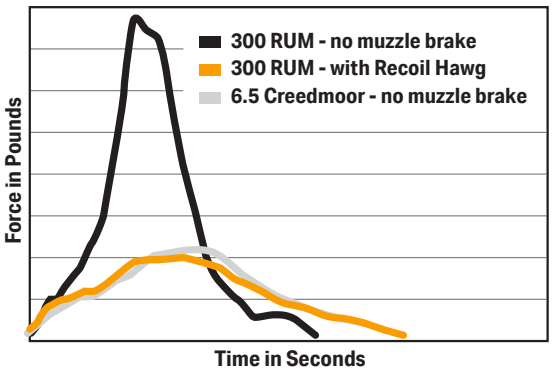

The Sporter Recoil Hawg, although slightly smaller to fit trimmer contour barrels, also reduces recoil up to 76%.

Directing the gases to the sides and up also has the effects of reducing muzzle jump to keep the shooter looking downrange at their target to watch the bullet impact. The dust signature is also minimized as gases are not sent into the dirt below the muzzle.

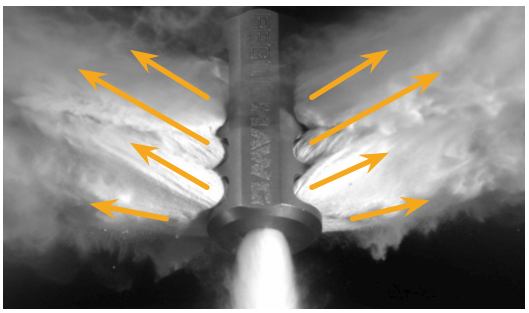

Constructed from steel, the Recoil Hawg is built for long-term durability. It can also be easily removed and replaced with the included thread protector (hunting models).

- Multi-port designs reduce felt recoil up to 76% (depending on caliber and style of brake)
- Top and side ports direct gases up and to the sides, reducing muzzle rise
- Closed bottom design reduces dust signature
- Rugged all-steel construction

- Recoil Hawg : Multi-caliber design fits most rifle barrels .30 caliber or smaller with a 5/8"-24 TPI or 1/2"-28 TPI threaded muzzle (Barrel shoulder must be at least .700" to install)
- Sporter Recoil Hawg: Multi-caliber design fits X-Bolt Speed rifles and most sporter-weight rifle barrels .30 caliber or smaller with an M13x1.25 or M13x.75 threaded muzzle

Recoil Hawg Muzzle Brake Test
X-Bolt Max Long Range, 300 (RUM)

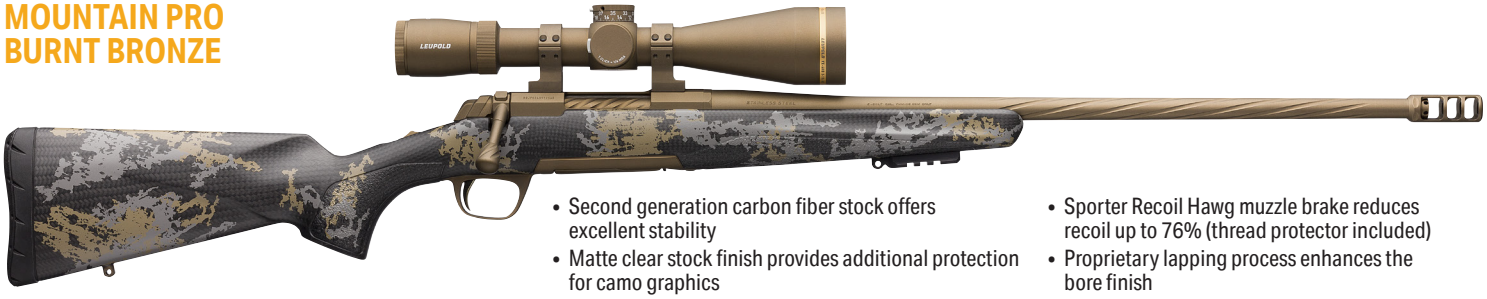

Specially designed directional porting blows gases up and to the sides to minimize dust signature.

MOUNTAIN PRO LR TUNGSTEN

RECOIL HAWG™

- Second generation carbon fiber stock offers excellent stability
- Matte clear stock finish provides additional protection for camo graphics
- Stainless steel barreled action with Tungsten Cerakote offers superior protection over traditional bluing or bare stainless steel
- Heavy sporter contour, spiral fluted barrel
- Recoil Hawg muzzle brake reduces recoil up to 76% (thread protector included)
- Proprietary lapping process enhances the bore finish
- Spiral fluted bolt with rust-resistant Tungsten Cerakote finish
- Picatinny accessory rail on stock included

SPEED LR

- Smoked Bronze Cerakote finish protects better than traditional bluing or bare stainless steel
- Fluted, sporter contour barrel for the ideal blend of accuracy and weight savings
- Belled muzzle allows for common, suppressor-ready threads to be added to the lighter contour barrel
- Extended bolt handle
- Sporter-style composite stock with adjustable comb system offers up to 1" of height adjustment
- Threaded muzzle brake reduces recoil (thread protector included)
- Versatile Browning OVIX camouflage

AB3
Common Features

FREE-FLOATING BARREL
The AB3 features a free-floating barrel. Barrels are button rifled and triple checked for interior finish, straightness and air-gauged for uniformity. Every chamber is hand-reamed for precision accuracy and a recessed muzzle crown helps protect the rifling from damage.

LARGE BOLT SURFACE AREA
The robust bolt is machined from solid steel bar stock and internally relieved to keep weight low and offer additional rigidity. A smooth chrome finish is quiet and offers smooth cycling. Three locking lugs provide exceptional bolt strength.

BOLT LOCK OVERRIDE BUTTON
The bolt unlock button provides an extra margin of safety when checking and unloading the chamber.

TOP-TANG SAFETY
The top-tang safety is easy to operate with the thumb. It blocks the trigger sear and features a firing pin block for added security.

DETACHABLE MAGAZINE
Polymer and steel construction is lightweight and extra tough. The innovative spring and follower design minimizes follower tilt for reliable feeding.

60° BOLT LIFT
Short 60˚ bolt lift is fast cycling and allows the hand to easily clear scope turrets.

INFLEX RECOIL PAD
The Inflex recoil pad features internal directional ribs that move the comb down and away from the cheek to increase shooting comfort.

BLR®

Common Features

RACK AND PINION LEVER ACTION

The glass-smooth rack and pinion lever-action features a strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

RECEIVER

Constructed from rugged, lightweight aluminum alloy.

FOLDING HAMMER

The folding hammer provides an added measure of safety when the hammer is at half-cock. It has four positions: Full-cock, half-cock, the folded hammer position and the dropped, or fired position. The two positions at half-cock readily indicate the status of the rifle.

DETACHABLE BOX MAGAZINE

The detachable box magazine provides reliable feeding and allows the use of ammunition with superior pointed bullets.

LEVER

The trigger travels with the lever to prevent pinching fingers when working the lever.

TAKEDOWN FEATURES

BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store. The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends easily into the styling of the rifle.

BLR®

LIGHTWEIGHT '81 STAINLESS TAKEDOWN

- Rifle quickly takes down into two parts for travel or storage
- Non-reflective satin nickel receiver finish
- Matte stainless steel barrel
- Gray laminated, satin finish straight grip stock with cut checkering
- Barrel is drilled and tapped for optional scout-style scope mount
- TRUGLO®/Marble Arms® fiber-optic front sight and adjustable rear sight
- Swivel studs

BAR®

Common Features

ACTION

The BAR is a gas-operated autoloader with a high-strength, rotating bolt that locks into the barrel. The seven-lug bolt and precise breech-to-chamber relationship gives the BAR exceptional accuracy and the strength to handle magnum rifle loads. A strong action bar/inertia block link-up reduces barrel vibration to improve accuracy. An integral buffering system reduces wear and stress on the rifle's operating system.

RECEIVER

BAR MK 3 models use an aircraft-grade aluminum alloy receiver and the BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.

DETACHABLE BOX MAGAZINE

The detachable box magazine attached to a hinged floorplate allows the shooter to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

INFLEX RECOIL PAD

BAR MK 3 models include a premium Inflex recoil pad featuring internal directional ribs that move the comb down and away from the cheek to increase shooting comfort.

BAR®

MK 3

- Satin nickel receiver finish
- Polished blued barrel
- Oil finish Grade II walnut stock with cut checkering
- High-relief engraving
- Shim-adjustable for cast on/off and drop at comb
- Inflex recoil pad

T-BOLT

Common Features

BARREL

Target/Varmint models feature a 16-1/2" or 22" medium target profile barrel and Sporter models feature a 22" medium sporter profile. The action is bedded to free-float the barrel. A semi-match chamber and target muzzle crown are also included.

DOUBLE HELIX MAGAZINE

The patented Double Helix rotary box magazine uses torsion spring and driven interlocking gears for added reliability and easy loading and unloading. 10-round capacity.

DOUBLE HELIX

STRAIGHT PULL BOLT-ACTION

The receiver is machined from steel bar stock and features classic crossbolt lockup, with an enlarged bolt handle pivot point moved forward for smoother action. A mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. Includes dual extractors with red cocking indicator band.

ADJUSTABLE TRIGGER

The three-lever trigger design combined with a short-travel firing pin give a crisp break, with no take-up and minimal overtravel. Adjustable for pull weight.

TOP-TANG SAFETY

The top-tang safety is easy to operate with the thumb without changing from a shooting grip.

STOCK

The stocks are full-size to comfortably fit adults. Sporter models feature trim dimensions with a satin finish and traditional point checkering pattern. Target/Varmint models feature a Monte Carlo comb and wide fore-end for stability on the bench. Dual action screws provide solid attachment to the stock. Sling swivel studs included.

T-BOLT

BL-22

Common Features

OPTICS READY
Receiver is grooved for scope rings.

RECEIVER
Machined from solid steel, the BL-22 features a level of quality missing from many of today's rimfire rifles.

LEVER
The BL-22 features smooth, quick-cycling 33° lever throw.

TRIGGER
The trigger travels with the lever to help prevent finger pinch.

AMMUNITION
The versatile BL-22 fires 22 Short, Long and Long Rifle ammunition.

SA-22

Common Features

TAKEDOWN FEATURE

The SA-22 can be quickly taken down to a compact length of only 19-3/8" for storage or transportation.

RECEIVER

Machined from steel, the SA-22 features quality missing from many of today's rimfire rifles.

IN-STOCK MAGAZINE

To maintain the trim dimensions of the rifle the tubular magazine is located in the stock. Cartridges load through a port in the right side of the buttstock.

BARREL ADJUSTMENT

The knurled knob allows play to be adjusted out of the barrel to ensure accuracy.

BOTTOM EJECTION

Bottom ejection makes the SA-22 ideal for right- and left-handed shooters alike.

THE JOHN M. BROWNING COLLECTION

B15 BEAUCHAMP

Common Features

HERSTAL BELGIUM 18 78
JOHN M. BROWNING
COLLECTION

INTERCHANGEABLE CHOKE TUBES

The B15 Beauchamp features the innovative Invector-DS Interchangeable Choke Tube System to optimize pattern perfromance.

A TRADITION OF STRENGTH

Like every Citori, the B15 Beauchamp is built for the next generation with a stronger and longer lasting design that is expertly hand adjusted for proper fit and function.

B15 models pivot on a full-width hinge pin that glides on significantly more bearing surface area than the trunnion systems used in competitors' guns. Additionally, a transverse-mounted, full-width tapered locking bolt and monoblock recess for maximum strength and longevity. This design self-adjusts for wear to keep receiver lock-up tight.

GLOSS BLUED BARRELS

Extremely durable, the beautifully polished finish resists corrosion.

RECEIVER MATERIALS

The receiver is machined from steel and features a durable silver nitride finish that offers improved wear resistance, increased fatigue strength and added protection against corrosion.

FIRE LITE TRIGGER

This mechanical trigger offers immediate second shot capability without using recoil to set the next shot. Provides improved performance with reduced take-up, a crisp break and less overtravel.

CHROME CHAMBERS

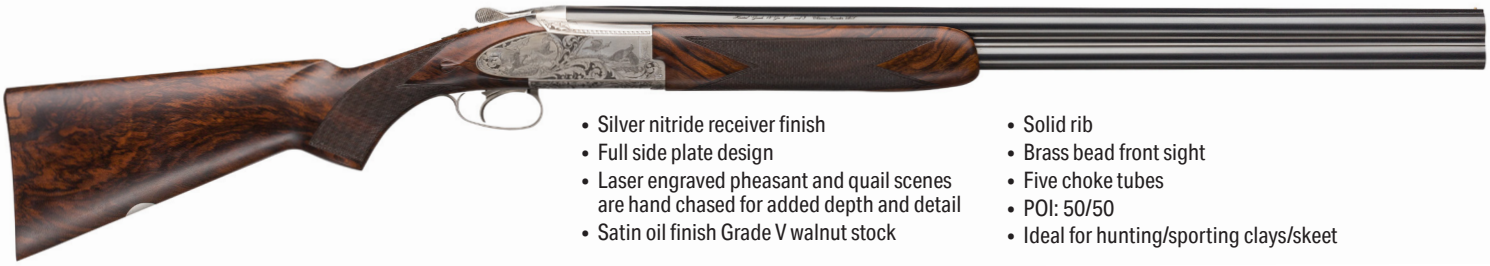

Chrome chambers increase durability, corrosion resistance and are easier to clean.

HAMMERS AND HAMMER EJECTORS

The hammers are driven by powerful coil mainsprings. Ejectors are activated by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. Fired hulls are ejected when the breech is opened and unfired shells are elevated for easy removal.

B15 BEAUCHAMP

Grade B

- Silver nitride receiver finish
- Full side plate design
- Laser engraved pheasant and quail scenes are hand chased for added depth and detail
- Satin oil finish Grade V walnut stock

B25

JohnMBrowningCollection.com

The B-25 is the epitome of over and under shotguns. Each gun is true to John M. Browning's original design and crafted to the personal specifications of the owner. For example, the full sideplate design of the B25 Side Plate Trap creates a stunning canvas for traditional engraving and precious metal inlays.

Other models like the B25 Sporter New Generation are available with custom touches like an Olympic trigger, vented top and side ribs and exquisite, deeply figured walnut stocks with the choice of a fixed or an adjustable comb.

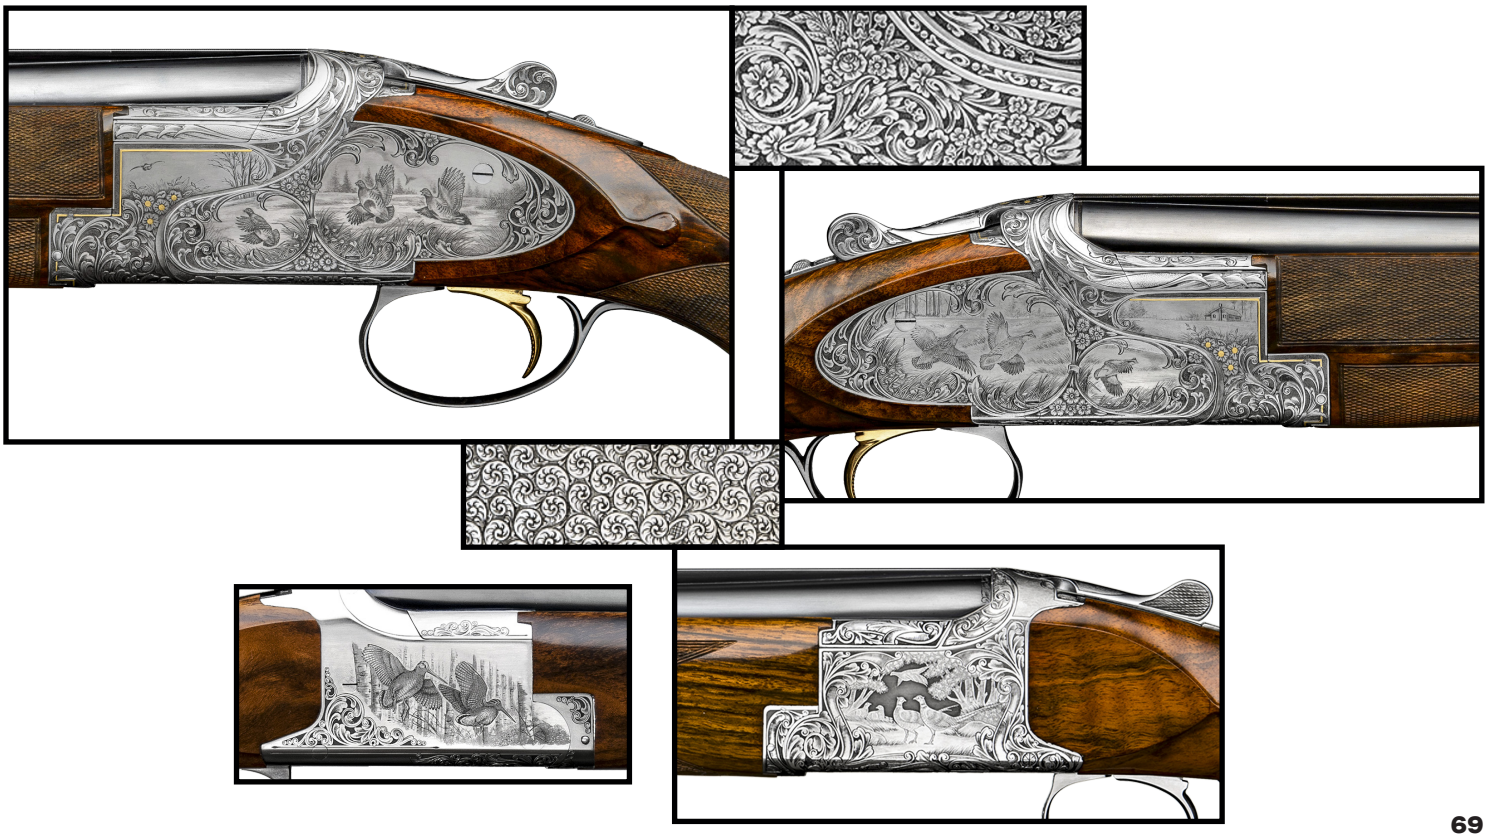

A custom B25 is limited only by the imagination of the buyer — the shotguns shown here showcase a small fraction of the possibilities. Visit johnmbrowningcollection.com to see additional models and available options. **For complete ordering information in the United States, please contact your sales representative or Browning directly at 801-876-2711.**

B25 SPORTER NEW GENERATION

2023

SAFES

SAFES
Technology

SERIOUS SECURITY COMPONENTS.

To offer protection from thieves and untrained hands, a gun safe must offer robust protection. Browning ProSteel safes call on industry-standard locks, steel hardplate lock protection and precision-made diversion bar locking systems to guard against pry, punch and drill attacks. Tried and true round bolts are chrome plated for smoothness and attached to the bolt bar with a combination of heavy-duty hardware and strong, professional welds.

SOLID BOLTS OFFER INCREASED STRENGTH.

PRY-STOP END BOLTS

Pry-Stop End Bolts replace the top and bottom locking bolts on the door side and secure the critical door corners. Pry-Stop End Bolts are over two and one-half times longer than a standard bolt. They attach to high-strength angle steel that prevents the locking bolt support bar from bending in a pry attack.

PRY-STOP CORNER BOLTS

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack.

OMNIBARRIER

OMNIBARRIER® LOCK PROTECTION SYSTEM

A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

FORCE DEFLECTOR™ LOCKING SYSTEM

The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

UNI FORCE

UNI-FORCE™ LOCKING SYSTEM

The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

PRY-STOP TABS

PRY-STOP TABS

Pry-Stop Tabs are pieces of angled steel added to the top and bottom bolts and inside the safe door. These reinforcements work together to increase pry resistance.

DUO FORMED DOOR

DUO-FORMED® DOOR

The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel adds outstanding strength. The door face is 1-11/16" thick.

FORMED DOOR

FORMED DOOR

The Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME

The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

180°

180° HEAVY DUTY HINGES

Rugged exterior hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. External hinges eliminate the need to remove insulation which improves fire protection.

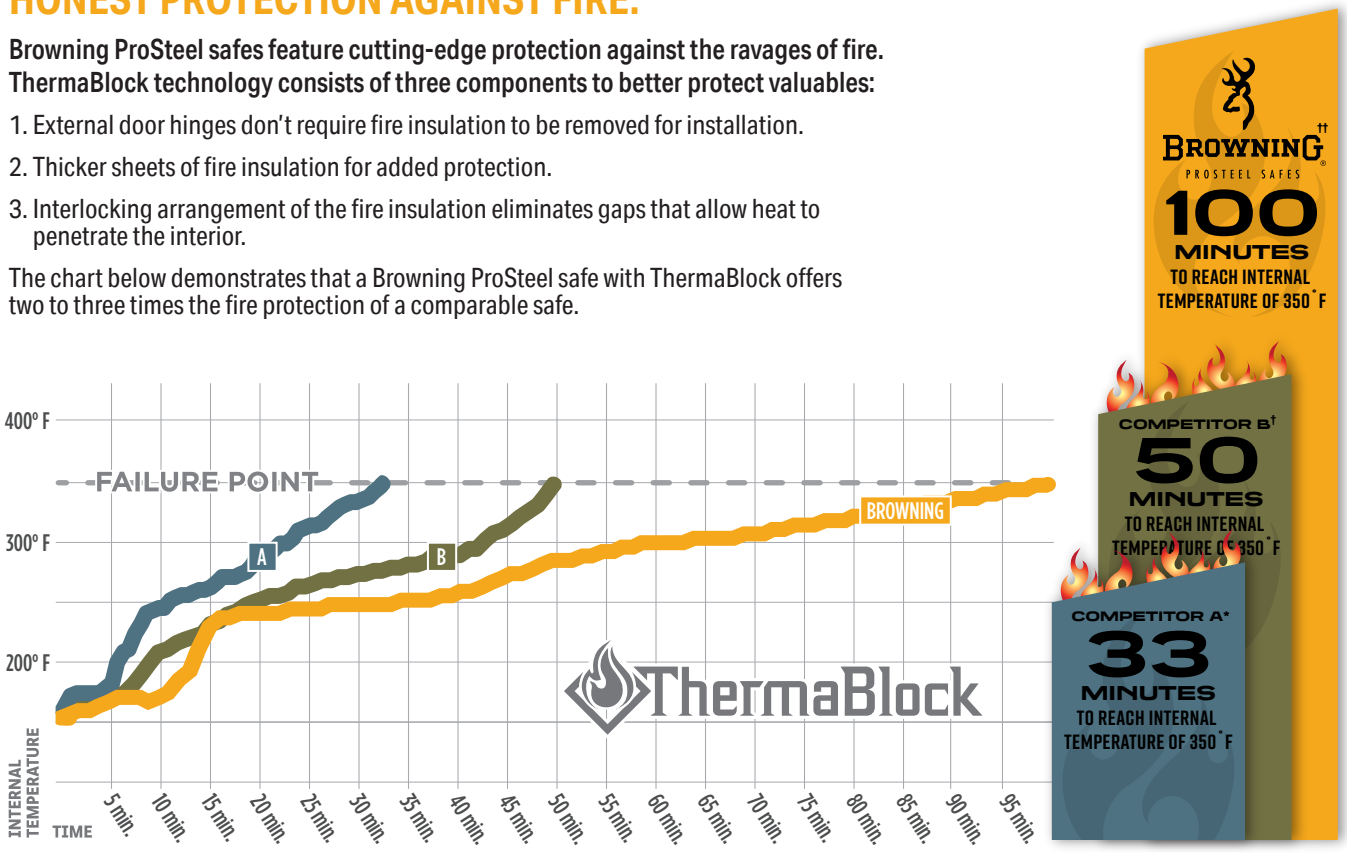

SAFES
Fire Protection

HONEST PROTECTION AGAINST FIRE.

Browning ProSteel safes feature cutting-edge protection against the ravages of fire. ThermaBlock technology consists of three components to better protect valuables:

1. External door hinges don't require fire insulation to be removed for installation.
2. Thicker sheets of fire insulation for added protection.
3. Interlocking arrangement of the fire insulation eliminates gaps that allow heat to penetrate the interior.

The chart below demonstrates that a Browning ProSteel safe with ThermaBlock offers two to three times the fire protection of a comparable safe.

* Competitor A safe: Rated 90 minutes at 1650° F / † Competitor B safe: Rated 90 minutes at 1200° F / †† Browning ProSteel safe: Rated 100 minutes at 1680° F

GAPLESS FIRE INSULATION.

Door hinge style may seem like a small detail, yet it is crucial to fire protection. An internal hinge requires fire protection material be removed where the hinges attach. In a fire, the unprotected hinge areas allow the internal temperature of a safe to rise faster and to a significantly higher temperature than in a Browning ProSteel safe with no unprotected areas.

BROWNING PROSTEEL EXTERNAL HINGES

External hinges eliminate gaps in the fire insulation, blocking heat from entering the safe.

COMPETITORS' INTERNAL HINGE

Internal hinges allow up to eight times more heat to radiate inside the safe through gaps in the fire insulation.

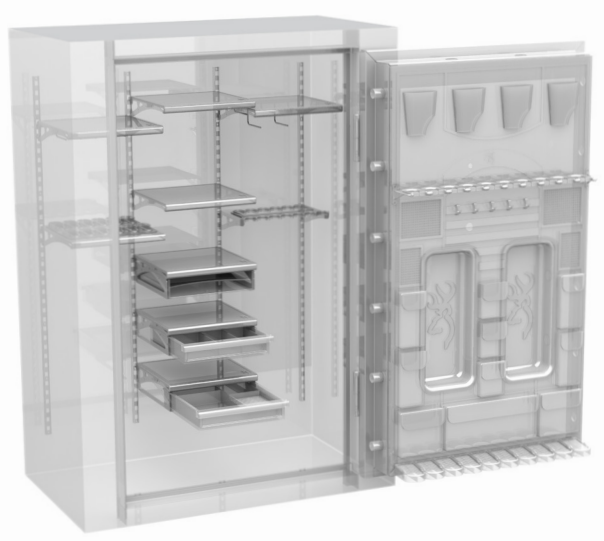

Browning ProSteel safe with 1-7/8" thick insulation after 100 minutes at 1680°.

Leading competitor safe with 1-7/8" thick insulation after 90 minutes at 1680°.

SAFES

Axis and CMS Shelving, Warranty

COUNTLESS INTERIOR OPTIONS.

Browning ProSteel safes offer the most versatile interiors in the industry, allowing for more storage and better organization of valuable items.

Axis and CMS shelves and accessories are interchangeable with Browning ProSteel safes greater than 20 cubic feet in size.

AXIS

The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is an easy to customize system with an array of shelves that can be configured to meet virtually every need. The Axis shelf is made from a single piece of sturdy steel, covered in a soft, protective silicone rubber that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior. Axis accessories are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

CMS

CMS (Cantilevered Modular Shelving) shelves are constructed of wood, covered in soft carpet and built upon a tough steel frame. CMS borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustment of the higher-end system. Like Axis, CMS can be adjusted up and down, side to side, added and removed to fit a wide range of valuables.

LIFETIME WARRANTY.

BROWNING SAFE WARRANTY LIFETIME PROSTEEL

All Browning ProSteel safes carry the UL RSC (Underwriters Laboratories Residential Security Container) rating — the industry standard that defines a home security safe. The UL RSC rating ensures that a safe meets construction specifications and has passed a series of independent laboratory test attacks. Confidence in Browning ProSteel product leads to the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, or fire. If one of our safes is involved in one of these situations and the homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

SAFES

Storage

SECURE UP TO 54% MORE LONG GUNS.

HOW DO BROWNING PROSTEEL SAFES HOLD MORE GUNS?

- The long gun capacity is a series of three numbers, for example 13/26+7 on a 23 cubic foot safe.
- The first number is the long gun capacity in the safe body with a Half Shelf interior (13 in the example).
- The second number is the long gun capacity in the safe body with an All Gun interior (26 in the example).
- The "plus" number is the long gun capacity on the back of the door (+7 in the example).
- Total capacity grows up to 54% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- "Quick Access Guns" increase in both Half Shelf and All Gun configurations. These are guns on the front row of the safe body and the door gun rack and can be quickly accessed.

CAPACITY COMPARISON	COMPETITOR 25-28 CU FT SAFE	BROWNING PROSTEEL 23 CU FT SAFE	RESULT
Total Gun Capacity - Half Shelf Interior	13 Guns	20 Guns	54% More
Total Gun Capacity - All Gun Interior	27 Guns	33 Guns	22% More
Fast Access Guns - Half Shelf Interior	2 Guns	14 Guns	600% More
Fast Access Guns - All Gun Interior	7 Guns	21 Guns	200% More

PATENTED CONVENIENCE.

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and valuables to be stored on the back of the safe door. The DPX Quick Access Barrel Rack puts long guns on the door for instant access and the available Scope Saver increases storage and protects optics. DPX pouches and pockets keep valuables and gear where they are easy to find and free up shelf space for even more items.

QUICK ACCESS BARREL RACK

BROWNING EXCLUSIVE

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

MESH POCKETS

See-through mesh pockets hold smaller items and make valuables fast and easy to visually locate.

MAGNETIC CLOSURE STORAGE POUCHES

Accessory pockets protect and separate items and free-up shelf space.

PISTOL POUCHES

Keep handguns easy to access and isolated from bumps and scratches in the sewn-on pouches on the DPX panel.

SCOPE SAVER

BROWNING EXCLUSIVE

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

STOCK TRAY

The molded stock tray secures stocks in position and helps prevent long guns from bumping into one another.

VAULT DOORS / SECURITY DOOR

Overview

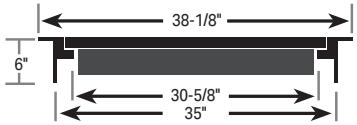

Internal Lock Release

SPECIFICATIONS

- 7-Gauge steel frame
- Designed to fit a variety of wall types and installation requirements
- OmniBarrier® Lock Protection System
- Uni-Force™ Locking System
- 1-7/8" of fire-resistant insulation in the door
- Knurled five-spoke Buckmark handle
- External ball-bearing hinges
- Palusol® expanding fire seal
- Also available with a black primer finish that is ready to paint and match any decor
- Internal lock release to open the door from within the vault

STANDARD SPECIFICATIONS

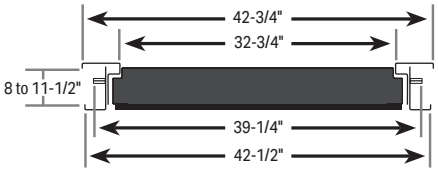

- The minimum rough door opening for the Standard Vault Door is 83" (H) x 36" (W).
- External L-frame with 1/2" diameter steel J-bolt anchors (included) can be poured in place in new construction or installed in an existing door frame by using expansion anchors or lag bolts (not included).
- Door frame L-flange will fit any wall with a minimum thickness of 5-1/2".
- Available in Out-Swing model only.

Standard Door Dimensions - Top View

CLAMSHELL SPECIFICATIONS

- The minimum rough door opening for the Clamshell Vault Door is 82" (H) x 40" (W).
- Clamshell flange design uses an internal and external flange for additional security and improved appearance.
- Can be secured into an existing door frame using the clamshell flange or, for additional security, using expansion anchors or lag bolts (not included).
- Clamshell flange has a 3-1/2" range of adjustment to fit walls with a minimum thickness of 8" to a maximum thickness of 11-1/2".
- Available in both In-Swing and Out-Swing models.

AXIS® ACCESSORIES

The accessories below are compatible with all Axis- and CMS-equipped safes built in 2018 and newer that are greater than 20 cubic feet in size.

PISTOL SHELF

Holds up to 12 handguns. The soft surface protects handguns from damage.

CODE	MSRP
154140	**89.99**

STEEL SHELF

The basic shelf is made from tough steel with a protective polymer skin.

CODE	MSRP
154100	**79.99**

PISTOL RACK

Holds five handguns and leaves the shelf available for other possessions and gear.

CODE	MSRP
154102	**39.99**

SCOPED PISTOL RACK

With a deeper drop and heavy-gauge rods, handguns with optics are easier to store.

CODE	MSRP
154118	**39.99**

HIGH CAPACITY BARREL RACK

Store more long guns in the same space with the high capacity barrel rack.

CODE	MSRP
154114	**69.99**

BARREL RACK

11 slots accommodate rifles, shotguns, carbines and modern sporting rifles.

CODE	MSRP
154101	**74.99**

BOW HANGER

Lock up and protect expensive archery equipment while taking up minimal space.

CODE	MSRP
154117	**54.99**

FILE BOX

Important documents are kept safe and easy to find in this handy file box.

CODE	MSRP
154149	**134.99**

VERTICAL FILE HOLDER

This file holder makes it easier to locate and organize important documents.

CODE	MSRP
154119	**54.99**

DRAWER

Perfect for all sorts of items that need to be separated.

CODE	MSRP
154144	**134.99**

DRAWER WITH JEWELRY INSERT

Protect and organize valuables such as watches, rings and necklaces.

CODE	MSRP
154145	**159.99**

DRAWER WITH FOAM INSERT

Customizable diced foam isolates prized possessions inside the drawer.

CODE	MSRP
154146	**159.99**

DRAWER WITH MULTIPURPOSE INSERT

Keep delicate items organized, protected and easy to find in the multipurpose drawer.

CODE	MSRP
154147	**159.99**

DRAWER WITH MONEY/PASSPORT INSERT

Compartments are sized to organize cash, passports and other documents.

CODE	MSRP
154148	**159.99**

DEEP DRAWER

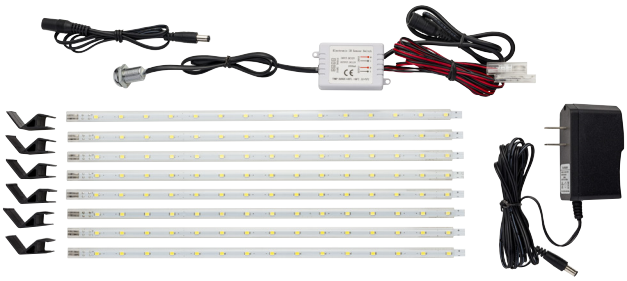

This large drawer is perfect for storing a variety of items under a shelf.

CODE	MSRP
154150	**219.99**

USER-INSTALLED ACCESSORIES

LED SAFE LIGHTING KIT

- Browning ProSteel factory-style LED safe lighting kit is easily installed in the door frame
- Motion sensor turns on the lights when the door opens and automatically shuts them off after the door closes
- Includes eight LED light tubes, mounting clips, A/C adaptor and motion sensor

CODE	MSRP
164157	**179.99**

BOLT DOWN HARDWARE KIT

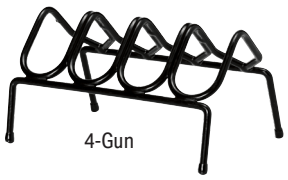

- Includes four lag screws for anchoring to wood floors and four concrete bolts and concrete anchors for securing to concrete
- Wood and concrete drill bits are also included

CODE	MSRP
164153	**19.99**

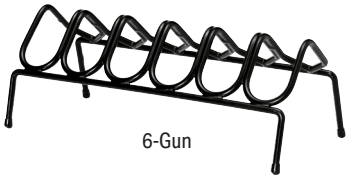

PISTOL RACKS

- Store handguns more efficiently
- Increases storage space on shelves
- Access to handguns is made easier by placing them in an upright position

4-Gun

CODE	MSRP
164150	**29.99**

6-Gun

CODE	MSRP
164152	**30.99**

ZERUST VCI PROTECTANT

- Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces
- Vapor Corrosion Inhibitors (VCI) have been used for years to protect metal parts in industrial and commercial applications
- One capsule protects a standard 30" wide (approximately 26 cu. ft.) safe for one year

CODE	MSRP
154011	**19.99**

DPX ACCESSORIES

- Take full advantage of the DPX storage system with these accessories
- Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two)
- Store shorter firearms and make them easily accessible with DPX Barrel Loops and DPX Stock Risers

Handgun Pouch

CODE	MSRP
164138	**54.99**

Barrel Loop

CODE	MSRP
164141	**39.99**

Stock Riser

CODE	MSRP
164144	**39.99**

USER-INSTALLED ACCESSORIES

VCI GUN SOCK

- Vapor Corrosion Inhibitor (VCI) penetrates into the smallest crevices and drives out moisture where oils cannot reach
- Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt
- Drawstring closure
- Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet
- Fits rifles and shotguns 48" to 56"

CODE	MSRP
149985	**29.99**

VCI GUN SOCK - TWO PIECE

- Vapor Corrosion Inhibitor (VCI) forms a protective vapor enclosure around the entire firearm
- Adds protection to all metal items in an enclosed gun safe or cabinet
- Drawstring closure
- Two piece design fits most takedown rifles and shotguns

CODE	MSRP
149986	**39.99**

DRY ZONE MOISTURE REDUCER

- Absorbs moisture without electricity and is rechargeable in an oven
- Can be reactivated indefinitely
- One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe

CODE	MSRP
154001	**59.99**

EVERDRY™ ELECTRIC DEHUMIDIFIER

- The EverDry™ Electric Dehumidifier removes humidity from the interior of a safe and protects against rust
- The 18" long EverDry should be used on safes 30" wide and larger
- Cord is removable for installation

CODE	MSRP
164128	**89.99**

FLEXIBLE EVERDRY™ DEHUMIDIFIER

- The Flexible EverDry™ is flat and easily bends
- Takes up less space and makes installation easier, especially in small safes
- Removes humidity from the interior of a safe and protects against rust
- Plug is removable for installation
- LED indicates unit is operating

CODE	MSRP
164129	**89.99**

USER-INSTALLED ACCESSORIES

- Mounts easily with no gunsmithing required on any Browning shotguns with vent ribs
- Includes three sizes of magnetic bases to fit virtually any shotgun rib
- Includes four interchangeable LitePipes of different diameters to match different lighting conditions

CODE	MSRP
12859	**35.99**

SCOPE MOUNTS / BASES / RINGS / RAILS

THE HEIGHT OF A SCOPE RING IS DETERMINED BY MEASURING FROM THE TOP OF THE BASE TO THE BOTTOM OF THE SCOPE RING. BARREL CONTOUR, OPTIC SIZE AND PREFERRED EYE RELIEF ALL AFFECT THE FIT OF THE SCOPE ON A RIFLE.

LOW HEIGHT (.300")
For scopes with an objective up to 44mm and a standard barrel contour.

MEDIUM HEIGHT (.400")
For scopes with an objective up to 50mm and a standard barrel contour.

HIGH HEIGHT (.500")
For scopes with an objective up to 56mm and a standard barrel contour.

INTEGRATED SCOPE MOUNT SYSTEM

NEW *Smoked Bronze Cerakote*

- The Integrated Scope Mount System combines the base an ring into a single unit machined from 7000 series aluminum alloy
- Eliminates alignment problems and the possibility of a loose connection between the base and ring

CHOKE TUBES

Technology

INVECTOR-DS CHOKE SYSTEM

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.
- A proprietary differential-banded brass seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.

INVECTOR-DS

INVECTOR-PLUS CHOKE SYSTEM

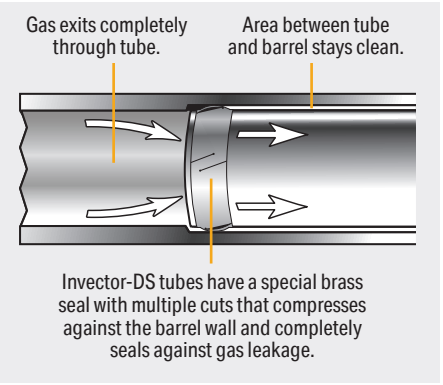

- The Invector-Plus interchangeable choke tube system works with Vector Pro and back-boring to offer consistent, dense shot patterns.
- The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors' guns, especially with steel shot.
- Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus II, Citori, Cynergy, Silver, BPS and BT-99 models.

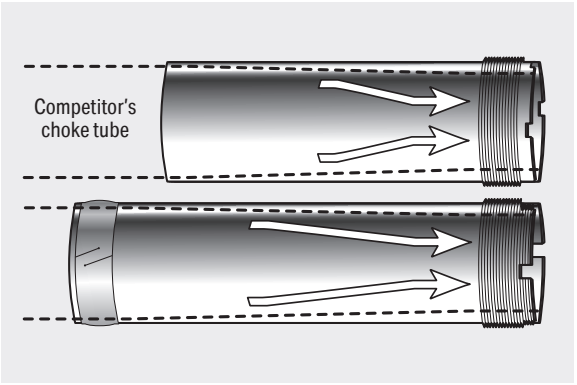

INVECTOR-Plus™

STANDARD INVECTOR

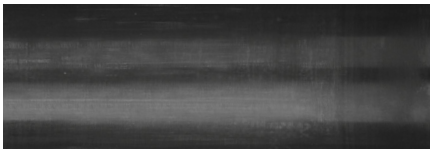

- The Standard Invector interchangeable choke tube system is for non back-bored Browning barrels and offers consistent, dense shot patterns. It's far more durable than the choke systems found in competitors' guns, especially with steel shot.
- Standard Invector eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel and it's standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.

STANDARD INVECTOR™

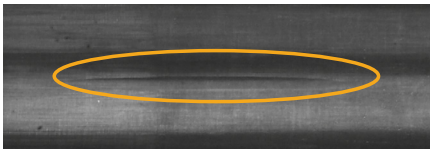

Longer overall length, as much as 1-1/8" over a leading competitor, allows a more gradual choke taper on Invector-DS tubes for denser shot patterns, better pattern percentages and faster shot velocities.

Browning Invector choke tube is still flawless after 500 rounds of steel shot.

Competitor's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

CHOKE TUBES

CLAY BURNER EXTENDED NEW

- Follows industry standard constrictions in 0.005" steps
- Designed specifically for clay target sports
- Durable stainless steel construction
- Highly polished interior finish reduces plastic buildup
- Extended length tubes are easy to change and add approximately 3/4" to the overall length of the barrel
- Proprietary differential banded brass gas seal eliminates residue buildup and makes chokes easy to remove and install
- Flat choke tube wrench is not compatible with Invector-DS choke tubes

CHOKE TUBES

DIANA GRADE EXTENDED

- Longer choke taper inside Invector-Plus choke tubes for use with back-bored barrels on 12 and 20 gauge shotguns
- Stainless steel barstock is heat treated prior to machining
- Titanium nitride surface 72HRC hardness for excellent wear and reduced plastic buildup
- Absolutely perfect concentricity for superior patterning
- Extends beyond the barrel for easy removal and installation
- Produces tighter patterns than Browning Invector-Plus flush choke tubes
- 28 gauge are Standard Invector chokes
- Flat choke tube wrench is not compatible with Diana Grade Extended choke tubes

KNIVES

KNIVES

Alloys, Profiles, Edge Grinds, Blade Deployment

BROWNING KNIFE DESIGN AND STYLING.

It is common for a hunting knife to cut through animal hide matted with dirt or strike a heavy bone, quickly dulling the sharpest blade. For this reason we have carefully selected steels that maintain a great cutting edge and can easily be sharpened by hand in the field. Our blade shapes, edge grind styles and steel alloys will meet the needs of the most discerning sportsman.

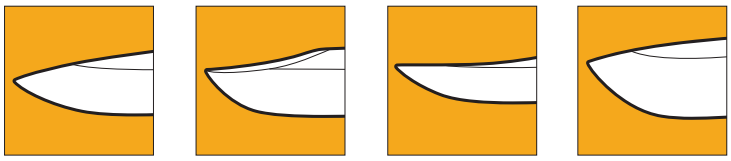

COMMON KNIFE BLADE ALLOYS

420J2	7Cr15Mo	8Cr13MoV 8Cr14MoV	9Cr14MoV 9Cr18MoV	D2	Sandvik 12C27	440C	Sandvik 14C28N	Damascus
A tough alloy often used in surgical instruments. It is easy to sharpen and is resistant to corrosion.	An all-around solid, budget-friendly imported stainless steel that sharpens easily and retains an edge well.	A rugged imported steel alloy that gives great corrosion resistance and edge retention.	A tough imported alloy with impressive edge retention and great corrosion resistance.	A rugged high carbon steel often used for heavy-duty cutting tools. This material offers excellent edge retention.	A well-balanced Swedish alloy giving excellent edge retention and is reasonably easy to sharpen.	A classic and proven hunting blade steel that produces an excellent balance between edge retention, ease of sharpening and corrosion resistance.	Top-grade steel ideally suited for applications that place very high demands on edge sharpness, edge retention, blade hardness and corrosion resistance.	This traditional steel is highly valued by collectors and users alike. Multiple layers of forged steel create amazing visual appeal and is easy to sharpen.

COMMON BLADE PROFILES

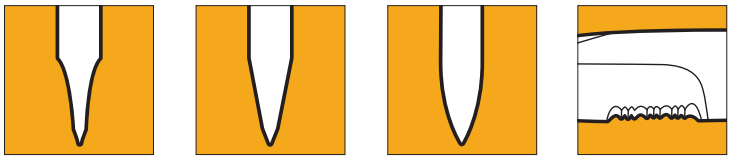

Hunting blade profiles are designed to field dress game animals and perform other chores around camp.

Inspired by our hunting blade designs, our Everyday Carry (EDC) knives are useful tools for a variety of daily cutting tasks.

DROP POINT | **CLIP POINT** | **TRAILING POINT** | **DEEP BELLY/ SKINNER**

BLADE EDGE GRIND STYLES

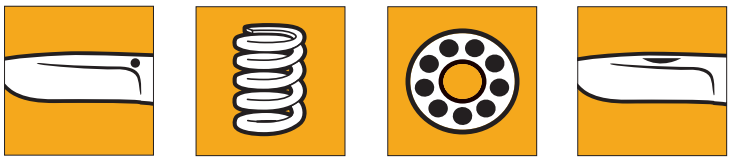

HOLLOW
Ideal for hunting knives and kitchen cutlery.

FLAT
Offers a durable edge for utility and everyday carry knives.

CONVEX
A heavy-duty edge for cutting tools like machetes, hatchets and axes.

SERRATED
Scalloped teeth easily cut through heavy fiber materials like rope, webbing and sinew.

BLADE DEPLOYMENT

THUMB STUD
The stud attached to the rear of the blade offers controlled, one hand opening.

SPRING ASSIST
A spring contained in the handle aids in the fast deployment of the blade.

BALL BEARING
The blade pivots on a precision ball bearing that minimizes friction for smooth deployment.

NAIL NICK
A classic style, the blade is opened using a fingernail in a small blade recess.

GUIDE SERIES

Designed by Wes Hibben, son of the legendary Gil Hibben, Browning's first hunting knife designer. Wes Hibben shaped his future at the age of eight when he built and sold his first knife. He learned the craft from his father, who has designed blades for hunting, survival and the silver screen for more than 65 years. Gil is also the man behind the very first Browning knives that appeared in our 1969 product catalog. Growing up, Wes spent every minute he could in his father's shop learning the knife making craft.

As an adult, Wes took his skills North to the great state of Alaska, and many of his edged creations are inspired by his personal experiences spent in the wilds as a hunter. His experience as a knife maker, along with his passion for hunting and the outdoors, have culminated in the Guide Series — the next generation of knives to share both the Hibben and Browning names.

Wesley R. Hibben

LIGHTS

LIGHTS

Technology, Performance Standards

SPOT-TO-FLOOD TECHNOLOGY

Spot-to-Flood Technology allows the user to rapidly adjust the focus of the beam by rotating the bezel. Choose from a broad, diffused light that is ideal for up-close work to a tightly focused beam that illuminates distant objects.

Look For This Icon On Browning Lights That Offer Spot-To-Flood Technology.

WIDE ANGLE TECHNOLOGY

Wide Angle Technology produces a very bright soft light that evenly illuminates your work area and softens harsh shadows.

Look For This Icon On Browning Lights That Offer Wide Angle Technology.

WIDE ANGLE PLUS TECHNOLOGY

Wide Angle Plus Technology produces both a wide angle and a long distance beam at the same time, or separately, to provide extended 180° lighting coverage.

Look For This Icon On Browning Lights That Offer Wide Angle Plus Technology.

ANSI FL 1 FLASHLIGHT PERFORMANCE STANDARDS

We proudly participate in the ANSI FL 1 flashlight performance standards for measuring and stating performance claims for all portable lights. This includes brightness (lumens), distance, run time, water resistance and impact resistance. FL 1 provides the only reliable apples-to-apples comparison between models and is used by most major manufacturers. Charging times are approximate for most AC power sources. Charging times from other power sources may be significantly longer. On lights with multiple settings, the lumens, battery life and distances are stated at the highest setting (100% power), unless otherwise indicated. Weights are measured as carrying weight, including battery.

MAXIMUM DISTANCE

Maximum distance is calculated as the distance from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

LUMENS = BRIGHTNESS

The output of a traditional 2D cell flashlight is approximately 15 - 20 lumens. The latest LED flashlights can have an output of more than 3200 lumens.

WATER RESISTANCE

Water resistance (FL 1 Standard IPX4) is tested by spraying water onto the light from multiple directions. This simulates a heavy, all-day rain.

WATERPROOF AND SUBMERSIBLE

Waterproof and submersible (FL 1 Standard IPX7) assures water cannot get inside the light. This test is conducted for 30 minutes at a water depth of 1 meter (about 39").

BATTERY LIFE

Battery life (run time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

IMPACT RESISTANCE

Impact resistance (FL 1 Standard 1m) measures how well the light resists damage when dropped repeatedly onto concrete from a height of 1 meter (about 39").

LIGHTS

Common Features

USB CHARGE

The USB interface has become the modern standard for recharging portable electronic devices. That's why we have a complete line of USB compatible lights. Several Browning lights have USB-C connectors for even faster charging.

ELECTRONIC LOCK-OUT

The Electronic Lock-Out prevents the light from being switched on accidentally when in a pocket or pack. This battery-saving feature is easily activated by holding down the main power switch for three seconds when the light is off.

POWER BANK

There is a USB "power out" feature built into many of our products to help keep USB lights and other electronic devices like mobile phones topped off and running at peak performance.

QUICK OFF

The Quick Off feature eliminates cycling through every light mode to turn off a light. Once a light mode is selected for three seconds, the light will turn off the next time the power switch is operated.

DUAL FUEL

Many of our USB charge lights are designed to run on standard AA, AAA or CR123A batteries or on USB rechargeable batteries.

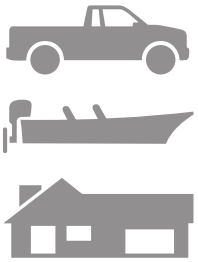

LAST LIGHT MEMORY

Activate the preferred light setting instantly with Last Light. Just stop on the desired light setting for three seconds and turn off the light. When you turn the light on the next time the light is automatically on the last used setting.

AC/DC/USB RECHARGEABLE

Certain Power Pro spotlights can be recharged or powered continuously at home or from a vehicle using using a 12V input/5V-2.4A output vehicle adaptor (included) or a 110V USB adaptor (not included) and a USB cable (included)

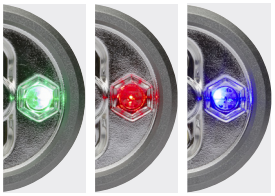

LOW BATTERY INDICATOR

Browning lights use two types of Low Battery Indicator. One automatically flashes the light five times on start up to let the user know that they have 20% or less battery capacity remaining. Other models have an LED indicator that glows red, yellow, green, depending on how much charge is left in the battery.

RED, GREEN AND BLUE LEDS

Many of our lights also offer multi-color LEDs for specialized tasks that help prevent spooking wary game animals, locating blood trails and preserving night vision.

RECHARGEABLE BATTERIES

We use the latest lithium-ion battery technology to help ensure that our lights have plenty of power when needed.

All of these batteries are designed to be easily recharged from a variety of power sources.

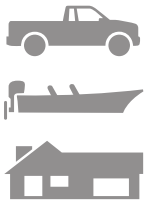

SPOTLIGHTS

NEW

HIGH NOON POWER PRO

BEAM DISTANCE	LUMENS RANGE	WATERPROOF SUBMERSIBLE/FLOATING	RUN TIME	IMPACT RESISTANT
120-515 yds	100-1700	3 feet/30 mins	3.75-48 hrs	1 meter

USB charging cable and vehicle adaptor included

POWER BANK
Draw power from the internal battery to charge other USB devices

USB CHARGE/CONTINUOUS POWER
Recharge the 5000 mAh Li-ion battery or power continuously at home or from a vehicle using a 12V input/5V-2.4A output vehicle adaptor and cable (included) or a USB adaptor (not included)

- Charge or continuously power by USB, 110V AC or 12V DC
- Long distance high, low and flashing modes
- Color-coded charging and power-remaining indicator
- Built-in folding stand with multiple positions
- Safety lock-out switch
- Lanyard included
- 6-1/2' USB charging cable and cable and vehicle adaptor included

NEW CAMOUFLAGE FROM BROWNING

OVIX™

AURIC™

EXTRAORDINARY CONCEALMENT

In 2022 Browning introduced OVIX Concealment and presented an extensive system of products to the big game hunting community that included an array of new technical apparel. From late summer archery muley hunts to the frigid whitetail hunts of the midwest, Browning gear with OVIX Concealment was tailored specifically for a variety of seasons and climates. For 2023, we have a similar overhaul prepared for waterfowl hunters.

To kick off the overhauled waterfowl program is new Browning AURIC Concealment. AURIC is a technical interpretation of wetland and dry grass terrain from an aerial point of view, specifically engineered to displace the hard silhouette of the human shape during overhead and fly by encounters. As with Browning OVIX, AURIC utilizes a combination of naturally-occuring colors with abstract shapes that cause vertical and horizontal disruption that confuses waterfowl and prevents them from pinpointing colors that naturally draw focus.

At farther distances, the yellow and tan colors overtake the dark brown and cause a color-blending effect. Additionally, atmospheric optics and white-light color scattering react with the yellows and tans to reduce any optical footprint. During cold front weather systems, AURIC exploits MIE lighting to replicate a hazy or washed out appearance for even greater effectiveness.

With the development of AURIC and its primary end use for cut fields and wetland environments, it only made sense to develop a new line of Wicked Wing apparel. The new line of Wicked Wing apparel runs the gamut from versatile 4 in 1 parkas to lightweight pieces that are ideal for layering or as an outer layer.

The combination of AURIC Concealment on a totally new waterfowl program is certain to be a hit with customers. Make sure your shelves are stocked.

SIZING CHART

1 SLEEVE
Starting from the center of the back of the neck, measure along the shoulder and down the elbow to the wrist bone.

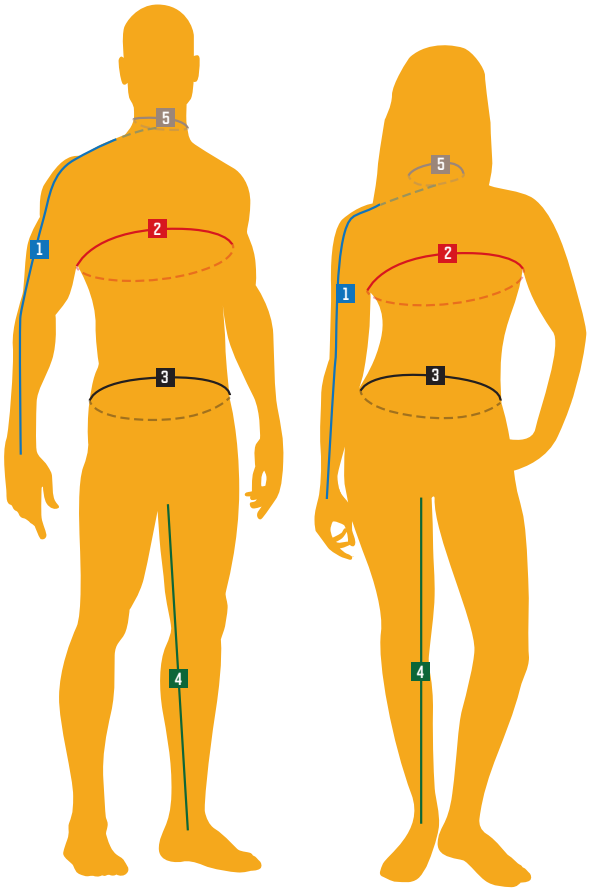

2 CHEST
Measure under the armpits, around the widest part of the chest and shoulder blades.

3 WAIST
Measure around the waist where pants are normally worn. Tape should be a little loose, enough to get one finger between the tape and the body.

4 INSEAM
While standing, measure from the crotch to the point where the pants normally end. This should be approximately at the top of the shoe and just above the heel in the back.

5 NECK
Measure around the base of the neck with the head up and eyes forward.

6 GLOVE
Close hand slightly and measure around the knuckles, excluding thumb.

Men's Fit

Traditional full cut offers maximum freedom of movement and comfortably fits a wider range of hunters.

	Small	Medium	Large	X-Large	XX-Large	XXX-Large
Chest	36-38	39-41	43-45	47-49	51-53	55-57

Circumference	7.5-8.5	8.5-9.5	9.5-10.5	10.5-11.5

FEATURES AND BENEFITS

HARNESS ACCESS
- Select Browning outerwear offers convenient Harness Access.
- Allows a tree stand safety harness to be comfortably worn underneath a parka or jacket.
- Improves concealment as the harness does not interfere with the camouflage pattern on the garment.

SILENTSNAPS
- SilentSnaps use a quiet polymer interface that won't spook game, yet are easy to use in any condition.

SILVADUR™
- Minimizing human odors in the field is a vital component of hunting. SILVADUR™ technology neutralizes the growth of odors on fabrics, helping to keep odors hidden from the sharp senses of game animals. Fabrics treated with SILVADUR technology provide long-lasting odor control.

DWR COATING
- The Browning Durable Water Repellent (DWR) treatment is applied to the outside face of the fabric. Highly water resistant (hydrophobic), the DWR causes moisture to bead on the outside of the fabric and prevents it from becoming saturated to slow water molecules from reaching the waterproof/breathable membrane. The DWR is long-lasting, durable and easily revived with heat from the sun or clothes dryer.

X-CHANGE SYSTEM
- The X-Change System returns for 2023 to the overhauled Wicked Wing line. The X-Change System allows the user to zip one of six liners into one of two waterproof shells to create their own, personalized technical waterfowl system that best suits their needs.

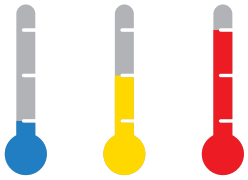

PRE-VENT PLUS
- Pre-Vent Plus is our own proprietary waterproof/breathable membrane that is featured in our waterproof, seam taped apparel. Pre-Vent Plus rivals the big names with a moisture vapor transfer rate of 8,000 molecules/inch 24/hour. The breathability of Pre-Vent Plus allows users to effectively manage the humidity within the micro environment of a waterproof jacket.

PRIMALOFT® DOWN BLEND
- Select garments feature PrimaLoft® Performance Down Blend insulation. Individual down tufts first receive an environmentally-friendly, fluorocarbon-free treatment to improve water repellency. The natural down is then fused with synthetic PrimaLoft fibers to create a unique hybrid insulation that's moisture blocking, permanently water-repellent and offers the best attributes of both parent materials.
- The warmth of premium PrimaLoft Silver insulation is comparable to traditional 650 fill down, yet it retains more than 95% of its full insulating capacity even when wet and it dries four times faster than regular down.

PRIMALOFT® INSULATION
- PrimaLoft® is a premium performance insulation that is engineered for superior warmth, water resistance, loft and compressibility.
- PrimaLoft has the best warmth-to-weight ratio in the industry. The fibers are more densely packed and retain heat better than other insulations for improved thermal efficiency.
- Water-resistant PrimaLoft fibers are permanently treated to repel water and prevent absorption, making PrimaLoft faster drying than other synthetic insulations.
- The fine-fiber, high-loft insulation keeps you warmer in extreme conditions, even if it gets wet.
- PrimaLoft is the choice of the U.S. Military. Over 1,000,000 PrimaLoft military garments are deployed in active service around the world.

HARNESS ACCESS · silvadur The Science of Intelligent Freshness · X CHANGE SYSTEM · DOWN BLEND · PRIMALOFT.

TEMPERATURE/CONDITIONS ICONS
We make clothing for all weather conditions. Look for the temperature and water resistance icons to determine what garments are best suited for the different hunting conditions.

Cold · Moderate · Hot

Thermometers indicate the temperature for which the performance of the garment is optimized.

Water Resistant · Waterproof/Breathable · Extremely Waterproof /Breathable

Water droplets indicate the level of protection against moisture and the breathability of the garment.

CAMOUFLAGE PATTERNS
In addition to proprietary camouflage patterns, Browning has partnered with industry leaders Mossy Oak® and Realtree® to provide hunters with a wide selection of camouflage patterns to maximize concealment for every environment. Throughout this workbook the complete pattern names are identified with their accompanying swatch. Where space is limited, such as in charts, an abbreviation of the pattern name is used. The information below matches the complete pattern name with the corresponding abbreviation.

X-CHANGE SYSTEM

CUSTOM PROTECTION

2023 marks the return of one of the most successful apparel programs in Browning history, the X-Change System. The X-Change System allows the user to select a waterproof rain shell and zip in a compatible liner jacket to create their own customized parka or jacket or that meets their individual needs based on the climate conditions. Zipping a liner into a shell effectively joins the two pieces into one, preventing the liner from bunching up under the shell. Because both the waterproof outer shells and the liners can be used individually; creating a versatile, interchangeable 3-in-1 system that is optimized for the weather forecast of the day is easy. As conditions change deeper into hunting season, additional liners can be purchased that further extend the temperature range of the outer shell.

The X-Change System is compatible with the new 2023 Wicked Wing outer shells and liners shown in the graphic below.

Bird'n Lite®

- Wide nylon shoulder straps transfer the load to the shoulders, yet still allow you to swing through the bird naturally.
- Quick-release sternum strap helps keep the weight centered between your shoulders for improved balance and less fatigue.
- Fully-adjustable load bearing straps place the load's center of gravity where it's most comfortable to carry.
- Ergonomically-contoured, padded adjustable waist belt offers added support to your lower back and allows part of the load to be carried on your hips for greater comfort.
- Quick-release composite buckle allows for quick on and off.

Pad

Harness

REACTAR G3 PAD
REACTAR G3 PAD AND HARNESS

PAD

- Lightweight Technogel® material reduces peak felt recoil
- Individual tower and gap design allows the Technogel to travel and deform, further improving shock and recoil reduction properties
- Fits in the shoulder pocket of many Browning garments
- Thin construction does not adversely affect length of pull
- Dimensions: 3-1/2" W x 6-5/8" L

PAD AND HARNESS

- Includes REACTAR G3 pad
- Heavy-duty 500 denier Cordura® harness features
- Reversible for use by right- or left-handed shooters
- Elastic straps with buckles for size adjustment
- One size fits most

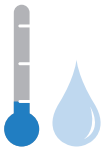

DESC	CODE	MSRP
